

# 2000 SF3 Census Data - Quick Reference Table

This reference table lists the most common census variables in SF3 for the 2000 Census. It was created to help users identify specific variables within the WAGDA census geodatabases. The geodatabases contain 76 data tables which list census variables based on field numbers. You can identify where specific variables are by using this list as a guide.

For example, if you want to map per capita income, scroll through this list and locate the entry for per capita income. The table number is 7 and the field number is P082001. Now, open the geodatabase, open table SF30007, and scroll to the right to find field P082001. Once you have located the table and field number for per capita income, you can add this table to ArcMap to map income at the geographic level of your choice.

For the full list of census variables in the databases, please view the Table Matrix Section from the 2000 Census SF3 documentation. A copy of the Table Matrix is available on WAGDA.
