1990 STF3 Census Data - Quick Reference Table

This reference table lists the most common census variables in SF3 for the 1990 Census. It was created to help users identify specific variables within the WAGDA census geodatabases. The geodatabases contain 34 data tables which list census variables based on field numbers. You can identify where specific variables are by using this list as a guide.

For example, if you want to map per capita income, scroll through this list and locate the entry for per capita income. The table number is 22 and the field number is P114A101. Now, open the geodatabase, open table STF322, and scroll to the right to find field P114A101. Once you have located the table and field number for per capita income, you can add this table to ArcMap to map income at the geographic level of your choice.

For the full list of census variables in the databases, please view the Table Matrix Section from the 1999 Census STF3 documentation. A copy of the Table Matrix is available on WAGDA.
